Latest features

- SmartConnect – QR scanning
- Easy bonding & unbonding
- All IQRF devices support

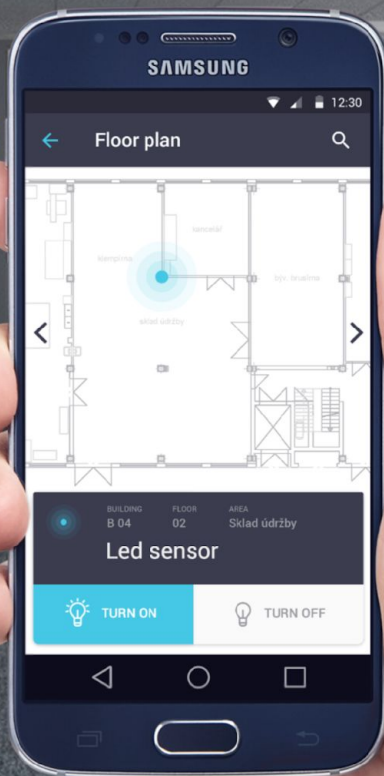

The image displays a mobile application interface for an "IQRF Network". The top bar is blue with the text "IQRF Network" and icons for network status and sharing. Below the bar, the device is identified as "NETIO Cobra 1 - 1x power plug" with a status of "Online". The device name is repeated below. A section titled "Sensors and Actuators" is expanded, showing a list of metrics:

- Low voltage: 244,50V
- Current: 0,01 A
- Power: 0,25W
- Power factor: 0,13
- Timespan: 49,94s
- Consumption: 29Wh
- DateTime: 0

At the bottom, there is a toggle switch and a blue circular button with a white plus sign.
